Annotations: before

- User experience not catering to small factor computers
- Users not aware of existing annotations
- Also middle size screens would give the impression of a glitch (comment cropped)

<i>my</i>	-áme	-íme	-ujeme	-eme
<i>vy</i>	-áte	-íte	-ujete	-ete
<i>oni</i>	-ají	-í	-ujou	-ou

+ časování sloves mít (rozdíl mít x mýt), být

+ u bydlet /ít /ět (vařit, sedět)

(časujeme slovesa, dáváme příklady – hádá se osoba; dávám osobu + sloveso)

1. sg, 3. pl. – Já kupuju / já kupuji; oni kupujou/ Oni kupují

Já (dělat).....

Ty (psát)..... Já píšu; ty píšeš; on píše, my píšeme, vy píšete, oni píšou

On (hrát).... Hraje, my hrajeme

Ona (mít) – ona má

Ono (být) - |

My (kreslit) – my kreslíme

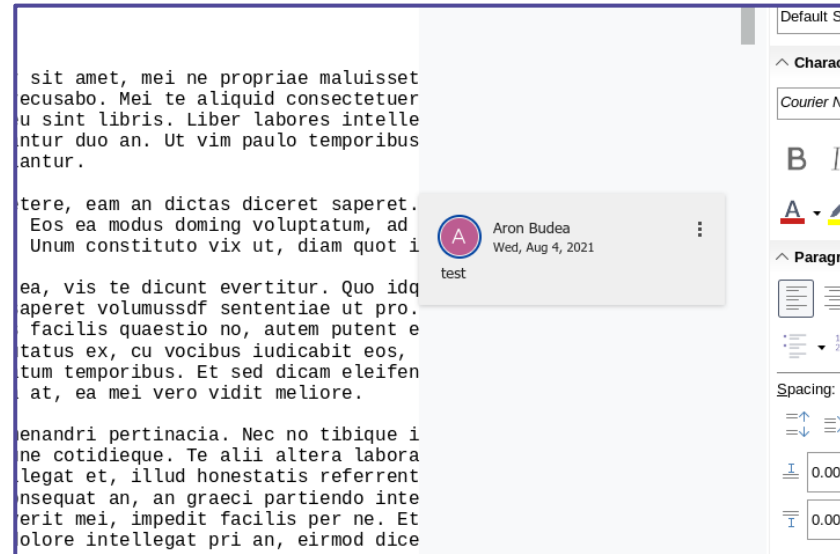

Oni (učit) – oni učí, men

No comments, right?

Annotations: before

- With the new cool canvas development
 - Some of those problems stayed
 - Some new appeared
 - Annotations become persistent at the point of blocking the actual document's content

Annotations: After

- **Avoid introducing drastic changes to the code**
 - Do not touch new canvas bits
 - Re-use nice mobilewizard pieces that brings many things for free already
- **Laptop users are now able to work better with annotations**
 - Even with a small screen real-state
 - Opportunity to bring coolness to **tablets**
- **Easier to keep track of annotations**
 - Easier to navigate between them and easier to use them to navigate the document

Comments:

- Pedro Mon, 27 Sep 2021: Good to place a nice header image with editable text so it doesn't depend on this section
- Pedro Mon, 27 Sep 2021: Easier to navigate between them and easier to use them to navigate the document

Small screens:

- Focus on the document
- Annotations still present
- Total per thread
- Access to all the actions via 3 dots menu
- Familiar user pattern

Anchoring: Before

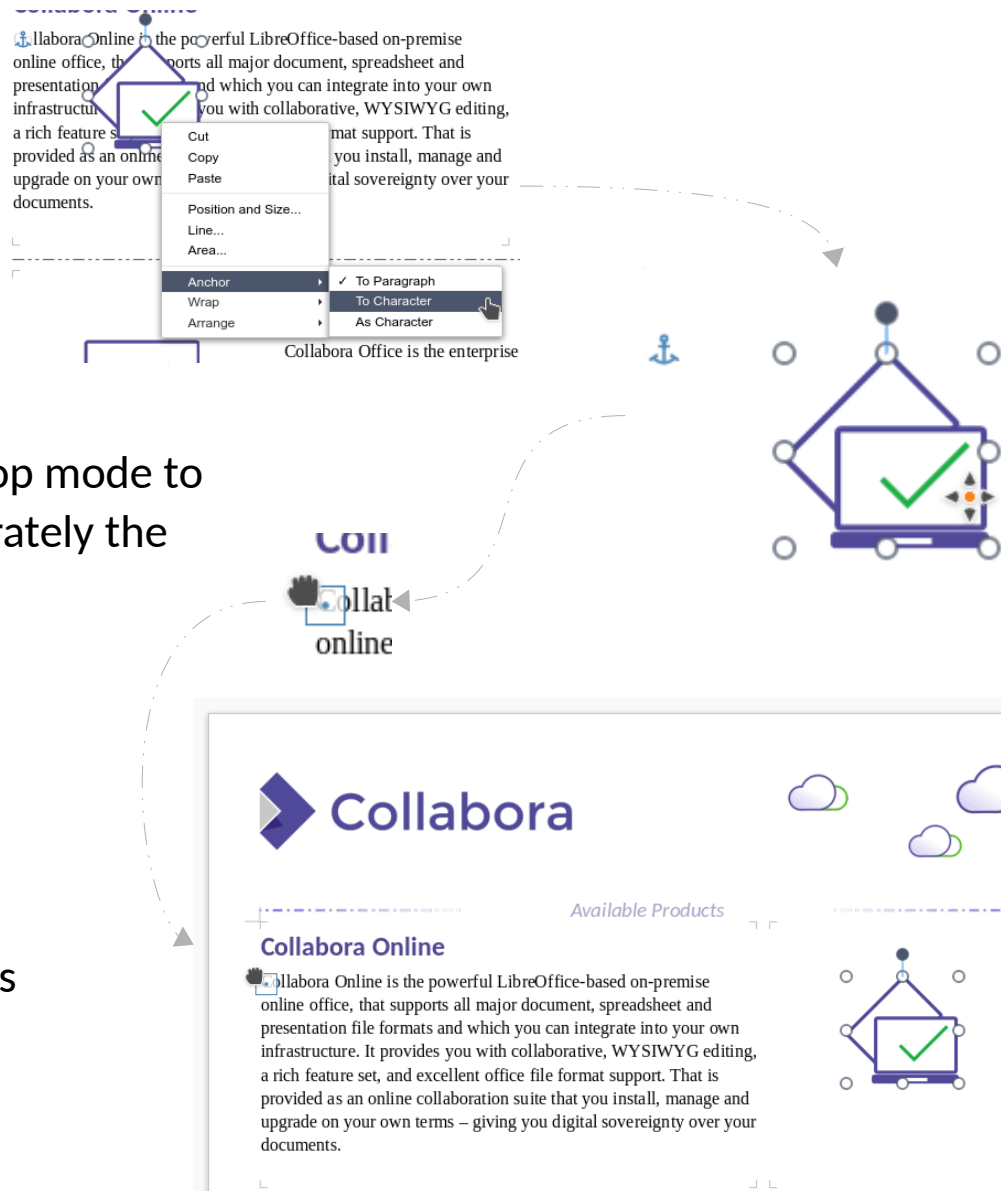

- **No visual feedback (no anchors)**
- **User forced to re-check by re-setting anchor**
 - Via context menu
 - Or offline
- **High probability for mistakes when editing and placing elements in the page**

Thanks to
Mert Tümer
for all the
work on this!

Anchoring: After

- Give full control to the user
 - Objects display anchor icon
 - Icon changes when in drag-n-drop mode to a point, allows pinpointing accurately the desired position
- Anchor: style
 - Distinguish states
 - Anchor icon appears discretely
 - Visual cues helps user and avoids frustration

Desktop design improvements

Knowing when it gets busy

- **Know when and what is going on**
 - Is it taking time to open, download, save?
 - Or did the connection failed? Are we re-connecting?
 - Was the document renamed?
 - Etc.
- **Getting messages out there so there is less guessing and more reassuring**

Service & Updates

Server is now reachable

RELOAD

- *Maintenance* — Fixes and feature improvements over lifetime
- *Signed* — Collabora stands behind it

The server has been disconnected.

The server has been disconnected.

Knowing when it gets busy

- **To do: Expand this level of consistency to other feedback pop ups**
 - And improvement other pop-ups such as: Document is idle, Inactive Document
 - Clipboard messages: downloading
 - Etc.

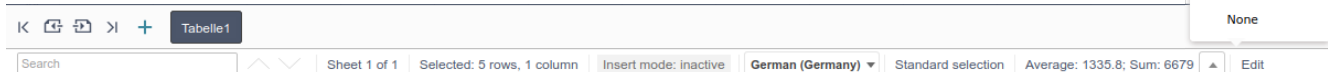

Status bar

- **Users depend on it**

- Journalists, Marketers, Copywriters, etc.

- Accounting personnel, Finance, Project Managers, etc.

- **Basic overview some a couple of status without additional clicks**

- **What about readonly mode vs edit mode?**

- Some costumers use in many contexts CO as a previewer
- Some users became a bit unsure of which mode they are currently in (requiring additional clicks until they realise what's what)
